Subject Index

Acidity
Surface acidity, catalytic activity and selectivity of some oxides supported on alumina (41)1
Acidity
Acidic properties of ZSM-5 zeolite and conversion of ethanol to diethyl ether (41)13
Acidity
Adsorption mechanism of phosphorus on alumina (41)261
Adsorption
Characterization of γ-alumina-supported tungsten sulfide hydroprocessing catalysts. I. Low-temperature oxygen chemisorption (41)165
Adsorption
Adsorption mechanism of phosphorus on alumina (41)261
Adsorption
Flue gas desulphurisation: Catalytic removal of sulphur dioxide by carbon monoxide on sulphided La_{1-x} Sr_x CoO_3. I. Adsorption of sulphur dioxide, carbon monoxide and their mixtures (41)273
Ageing
Effect of thermal treatment on the sintering and structural changes of cobalt–molybdenum/alumina and nickel–molybdenum/alumina hydrotreating catalysts (41)109
Ageing
Methanol and dimethyl ether conversion to hydrocarbons using tungsten trioxide/alumina as catalyst. A study of catalyst reactivation (41)253
Alkaline earth metal oxides
Hexane–carbon dioxide reaction catalyzed by alkaline earth metal oxides. II. Reaction network (41)199
Alkaline earth metals
Deactivation resistance of ZSM-5 type zeolites containing alkaline earth metals used for methanol conversion (41)121
Alumina
Adsorption mechanism of phosphorus on alumina (41)261
Ammonia oxidation
Ammonia–hydrazine conversion processes. XVI. Conversion of benzophenone azine into hydrazine catalyzed by sulphonic acids in a two-phase system (41)213
Aromatization
Factors affecting the selectivity of the aromatization of light alkanes on modified ZSM-5 catalysts (41)89

Benzene hydrogenation
Characterization of the standard platinum/silica catalyst EUROPT-1. VI. Catalytic properties (41)313
Benzophenone azine conversion
Ammonia–hydrazine conversion processes. XVI. Conversion of benzophenone azine into hydrazine catalyzed by sulphonic acids in a two-phase system (41)213
Butane oxidation
Effect of water vapor on the activity and selectivity characteristics of a vanadium phosphate catalyst towards butane oxidation (41)225
Butene oligomerization
Lumped kinetic model for propene–butene mixtures oligomerization on a supported phosphoric acid catalyst (41)301

Calcium oxide
Hexane–carbon dioxide reaction catalyzed by alkaline earth metal oxides. II. Reaction network (41)199
Carbon dioxide methanation
Comparative study of the activity of titania- and silica-based catalysts for carbon dioxide methanation (41)241
Carbon monoxide hydrogenation
Hydrocarbon synthesis over palladium/ZSM-5 bifunctional catalysts (41)65
Carbon monoxide hydrogenation
Preparation of monovalent copper by a single electron transfer step in the photoreduction of zinc oxide-supported copper catalysts (41)147
Catalyst characterization
Surface acidity, catalytic activity and se-

lectivity of some oxides supported on alumina (41)1
Catalyst characterization
Hydrocarbon synthesis over palladium/ZSM-5 bifunctional catalysts (41)65
Catalyst characterization
Preparation of supported $La_{1-x}Sr_xMnO_3$ catalysts by the citrate process (41)137
Catalyst characterization
Preparation of monovalent copper by a single electron transfer step in the photoreduction of zinc oxide-supported copper catalysts (41)147
Catalyst characterization
Characterization of γ-alumina-supported tungsten sulfide hydroprocessing catalysts. I. Low-temperature oxygen chemisorption (41)165
Catalyst characterization
Large pore nickel/silica-alumina catalysts for hydrogenation of synthetic distillates. Effects of composition and structure (41)177
Catalyst characterization
Hexane–carbon dioxide reaction catalyzed by alkaline earth metal oxides. II. Reaction network (41)199.
Catalyst characterization
Comparative study of the activity of titania- and silica-based catalysts for carbon dioxide methanation (41)241
Catalyst characterization
Flue gas desulphurisation: Catalytic removal of sulphur dioxide by carbon monoxide on sulphided $La_{1-x}Sr_xCoO_3$. II. Reaction of sulphur dioxide and carbon monoxide in a flow system (41)289
Catalyst preparation
Surface acidity, catalytic activity and selectivity of some oxides supported on alumina (41)1
Catalyst preparation
Hydrocarbon synthesis over palladium/ZSM-5 bifunctional catalysts (41)65
Catalyst preparation
Preparation of supported $La_{1-x}Sr_xMnO_3$ catalysts by the citrate process (41)137
Catalyst preparation
Preparation of monovalent copper by a single electron transfer step in the photoreduction of zinc oxide-supported copper catalysts (41)147
Catalyst preparation
Characterization of γ-alumina-supported tungsten sulfide hydroprocessing catalysts. I. Low-temperature oxygen chemisorption (41)165
Citrate process
Preparation of supported $La_{1-x}Sr_xMnO_3$ catalysts by the citrate process (41)137
Cobalt–molybdenum/alumina
Side reactions in quinoline hydrodenitrogenation (41)81
Cobalt–Molybdenum/alumina
Effect of thermal treatment on the sintering and structural changes of cobalt–molybdenum/alumina and nickel–molybdenum/alumina hydrotreating catalysts (41)109
Coke formation
Deactivation resistance of ZSM-5 type zeolites containing alkaline earth metals used for methanol conversion (41)121
Coke formation
Hexane–carbon dioxide reaction catalyzed by alkaline earth metal oxides. II. Reaction network (41)199
Combustion catalysts
Preparation of supported $La_{1-x}Sr_xMnO_3$ catalysts by the citrate process (41)137
Copper (I)/zinc oxide
Preparation of monovalent copper by a single electron transfer step in the photoreduction of zinc oxide-supported copper catalysts (41)147
Copper (II) oxide–zinc (II) oxide
Activity and stability of a copper (II) oxide–zinc (II) oxide catalyst for oxidative dehydrogenation of cyclohexanol to cyclohexanone (41)53
Copper–chromite
Selective hydrogenation of neat isoquinoline. I. Activities of some commercial catalysts and effects of coexisting sulphur-containing compounds in the substrate (41)99
Cyclohexane dehydrogenation
Characterization of the standard platinum/silica catalyst EUROPT-1. VI. Catalytic properties (41)313
Cyclohexanol dehydrogenation
Activity and stability of a copper (II) oxide–zinc (II) oxide catalyst for oxidative

dehydrogenation of cyclohexanol to cyclohexanone (41)53

Deactivation
Activity and stability of a copper (II) oxide–zinc (II) oxide catalyst for oxidative dehydrogenation of cyclohexanol to cyclohexanone (41)53

Deactivation
Deactivation resistance of ZSM-5 type zeolites containing alkaline earth metals used for methanol conversion (41)121

Dehydrogenation
Activity and stability of a copper (II) oxide–zinc (II) oxide catalyst for oxidative dehydrogenation of cyclohexanol to cyclohexanone (41)53

Dimethyl ether conversion
Methanol and dimethyl ether conversion to hydrocarbons using tungsten trioxide/alumina as catalyst. A study of catalyst reactivation (41)253

Electron transfer
Preparation of monovalent copper by a single electron transfer step in the photoreduction of zinc oxide-supported copper catalysts (41)147

Ethanol conversion
Acidic properties of ZSM-5 zeolite and conversion of ethanol to diethyl ether (41)13

Ethylene oxide oxidation
Ethylene oxide oxidation over a supported silver catalyst. I. Kinetics of uninhibited oxidation (41)23

Ethylene oxide oxidation
Ethylene oxide oxidation over a supported silver catalyst. II. Kinetics of inhibited oxidation (41)39

EUROPT-1
Characterization of the standard platinum/silica catalyst EUROPT-1. VI. Catalytic properties (41)313

Flue gas desulphurisation
Flue gas desulphurisation: Catalytic removal of sulphur dioxide by carbon monoxide on sulphided La_{1-x} Sr_x CoO_3. II. Reaction or sulphur dioxide and carbon monoxide in a flow system (41)289

Flue gas desulphurisation
Flue gas desulphurisation: Catalytic removal of sulphur dioxide by carbon monoxide on sulphided La_{1-x} Sr_x CoO_3. I. Adsorption of sulphur dioxide, carbon monoxide and their mixtures (41)273

Hydrocarbon synthesis
Hydrocarbon synthesis over palladium/ZSM-5 bifunctional catalysts (41)65

Hydrosulphurization
Effect of thermal treatment on the sintering and structural changes of cobalt–molybdenum/alumina and nickel–molybdenum/alumina hydrotreating catalysts (41)109

Hydrodesulphurization
Characterization of γ-alumina-supported tungsten sulfide hydroprocessing catalysts. I. Low-temperature oxygen chemisorption (41)165

Hydrogenation
Selective hydrogenation of neat isoquinoline. I. Activities of some commercial catalysts and effects of coexisting sulphur-containing compounds in the substrate (41)99

Hydrogenolysis
Hydrogenolysis of light hydrocarbons on rhodium/titania. Strong metal–support interactions and analysis of kinetic data (41)L1

Hydrotreating catalysts
Adsorption mechanism of phosphorus on alumina (41)261

Inhibited oxidation
Ethylene oxide oxidation over a supported silver catalyst. II. Kinetics of inhibited oxidation (41)39

Isoquinoline hydrogenation
Selective hydrogenation of neat isoquinoline. I. Activities of some commercial catalysts and effects of coexisting sulphur-containing compounds in the substrate (41)99

Kinetics
Hydrogenolysis of light hydrocarbons on rhodium/titania. Strong metal–support

interactions and analysis of kinetic data (41)L1
Kinetics
Ethylene oxide oxidation over a supported silver catalyst. I. Kinetics of uninhibited oxidation (41)23
Kinetics
Ethylene oxide oxidation over a supported silver catalyst. II. Kinetics of inhibited oxidation (41)39
Kinetics
Characterization of γ-alumina-supported tungsten sulfide hydroprocessing catalysts. I. Low-temperature oxygen chemisorption (41)165
Kinetics
Effect of water vapor on the activity and selectivity characteristics of a vanadium phosphate catalyst towards butane oxidation (41)225
Kinetics
Lumped kinetic model for propene–butene mixtures oligomerization on a supported phosphoric acid catalyst (41)301

Magnesia/alumina
Surface acidity, catalytic activity and selectivity of some oxides supported on alumina (41)1
Magnesium oxide
Hexane–carbon dioxide reaction catalyzed by alkaline earth metal oxides. II. Reaction network (41)199
Methanol conversion
Deactivation resistance of ZSM-5 type zeolites containing alkaline earth metals used for methanol conversion (41)121
Methanol conversion
Methanol and dimethyl ether conversion to hydrocarbons using tungsten trioxide/alumina as catalyst. A study of catalyst reactivation (41)253
Methanol synthesis
Preparation of monovalent copper by a single electron transfer step in the photoreduction of zinc oxide-supported copper catalysts (41)147

Nickel–molybdenum/alumina
Effect of thermal treatment on the sintering and structural changes of cobalt–molybdenum/alumina and nickel–molybdenum/alumina hydrotreating catalysts (41)109
Nickel/kieselguhr
Selective hydrogenation of neat isoquinoline. I. Activities of some commercial catalysts and effects of coexisting sulphur-containing compounds in the substrate (41)99
Nickel/silica
Comparative study of the activity of titania- and silica-based catalysts for carbon dioxide methanation (41)241
Nickel/silica–alumina
Large pore nickel/silica–alumina catalysts for hydrogenation of synthetic distillates. Effects of composition and structure (41)177
Nickel/titania
Comparative study of the activity of titania- and silica-based catalysts for carbon dioxide methanation (41)241

Palladium oxide
Activity and stability of a copper (II) oxide–zinc (II) oxide catalyst for oxidative dehydrogenation of cyclohexanol to cyclohexanone (41)53
Palladium/carbon
Selective hydrogenation of neat isoquinoline. I. Activities of some commercial catalysts and effects of coexisting sulphur-containing compounds in the substrate (41)99
Palladium/ZSM-5
Hydrocarbon synthesis over palladium/ZSM-5 bifunctional catalysts (41)65
Perovskite
Preparation of supported $La_{1-x}Sr_xMnO_3$ catalysts by the citrate process (41)137
Phosphoric acid
Lumped kinetic model for propene–butene mixtures oligomerization on a supported phosphoric acid catalyst (41)301
Phosphorus
Adsorption mechanism of phosphorus on alumina (41)261
Platinum/carbon
Selective hydrogenation of neat isoquinoline. I. Activities of some commercial catalysts and effects of coexisting sulphur-

containing compounds in the substrate (41)99
Platinum/silica
Characterization of the standard platinum/silica catalyst EUROPT-1. VI. Catalytic properties (41)313
Propene oligomerization
Lumped kinetic model for propene-butene mixtures oligomerization on a supported phosphoric acid catalyst (41)301

Quinoline hydrodenitrogenation
Side reactions in quinoline hydrodenitrogenation (41)81

Raney nickel
Selective hydrogenation of neat isoquinoline. I. Activities of some commercial catalysts and effects of coexisting sulphur-containing compounds in the substrate (41)99
Regeneration
Methanol and dimethyl ether conversion to hydrocarbons using tungsten trioxide/alumina as catalyst. A study of catalyst reactivation (41)253
Rhodium/carbon
Selective hydrogenation of neat isoquinoline. I. Activities of some commercial catalysts and effects of coexisting sulphur-containing compounds in the substrate (41)99
Rhodium/titania
Hydrogenolysis of light hydrocarbons on rhodium/titania. Strong metal-support interactions and analysis of kinetic data (41)L1
Ruthenium/carbon
Selective hydrogenation of neat isoquinoline. I. Activities of some commercial catalysts and effects of coexisting sulphur-containing compounds in the substrate (41)99

Selectivity
Surface acidity, catalytic activity and selectivity of some oxides supported on alumina (41)1
Selectivity
Hydrocarbon synthesis over palladium/ZSM-5 bifunctional catalysis (41)65
Selectivity
Side reactions in quinoline hydrodenitrogenation (41)81
Selectivity
Factors affecting the selectivity of the aromatization of light alkanes on modified ZSM-5 catalysts (41)89
Selectivity
Selective hydrogenation of neat isoquinoline. I. Activities of some commercial catalysts and effects of coexisting sulphur-containing compounds in the substrate (41)99
Selectivity
Effect of water vapor on the activity and selectivity characteristics of a vanadium phosphate catalyst towards butane oxidation (41)225
Silica/alumina
Surface acidity, catalytic activity and selectivity of some oxides supported on alumina (41)1
Silver
Ethylene oxide oxidation over a supported silver catalyst. I. Kinetics of uninhibited oxidation (41)23
Silver
Ethylene oxide oxidation over a supported silver catalyst. II. Kinetics of inhibited oxidation (41)39
Sintering
Effect of thermal treatment on the sintering and structural changes of cobalt-molybdenum/alumina and nickel-molybdenum/alumina hydrotreating catalysts (41)109
Strong metal-support interactions
Hydrogenolysis of light hydrocarbons on rhodium/titania. Strong metal-support interactions and analysis of kinetic data (41)L1
Structure
Large pore nickel/silica-alumina catalysts for hydrogenation of synthetic distillates. Effects of composition and structure (41)177
Sulphonic acids
Ammonia-hydrazine conversion processes. XVI. Conversion of benzophenone azine into hydrazine catalyzed by sulphonic acids in a two-phase system (41)213

Temperature-progammed desorption
Acidic properties of ZSM-5 zeolite and conversion of ethanol to diethyl ether (41)13
Temperature-programmed desorption
Flue gas desulphurisation: Catalytic removal of sulphur dioxide by carbon monoxide on sulphided La_{1-x} Sr_x CoO_3. I. Adsorption of sulphur dioxide, carbon monoxide and their mixtures (41)273
Titania/alumina
Surface acidity, catalytic activity and selectivity of some oxides supported on alumina (41)1
Toluene hydrogenation
Characterization of the standard platinum/silica catalyst EUROPT-1. VI. Catalytic properties (41)313
Tungsten sulphide/alumina
Characterization of γ-alumina-supported tungsten sulfide hydroprocessing catalysts. I. Low-temperature oxygen chemisorption (41)165

Vanadium phosphate
Effect of water vapor on the activity and selectivity characteristics of a vanadium phosphate catalyst towards butane oxidation (41)225

Water vapour
Effect of water vapor on the activity and selectivity characteristics of a vanadium phosphate catalyst towards butane oxidation (41)225
Water-gas shift reaction
Hexane-carbon dioxide reaction catalyzed by alkaline earth metal oxides. II. Reaction network (41)199

Zeolites
Acidic properties of ZSM-5 zeolite and conversion of ethanol to diethyl ether (41)13
Zeolites
Hydrocarbon synthesis over palladium/ZSM-5 bifunctional catalysts (41)65
Zeolites
Factors affecting the selectivity of the aromatization of light alkanes on modified ZSM-5 catalysts (41)89
Zeolites
Deactivation resistance of ZSM-5 type zeolites containing alkaline earth metals used for methanol conversion (41)121
ZSM-5
Acidic properties of ZSM-5 zeolite and conversion of ethanol to diethyl ether (41)13
ZSM-5
Factors affecting the selectivity of the aromatization of light alkanes on modified ZSM-5 catalysts (41)89
ZSM-5
Deactivation resistance of ZSM-5 type zeolites containing alkaline earth metals used for methanol conversion (41)121

applied catalysis

AN INTERNATIONAL JOURNAL DEVOTED TO CATALYTIC SCIENCE AND ITS APPLICATIONS

VOL. 41, NO. 1–2 CONTENTS JULY 15, 1988

(Abstracts/Contents Lists published in API Abstracts/Catalysts & Catalysis, Chemical Abstracts, Current Contents/Physical, Chemical & Earth Sciences, Current Contents/Engineering, Technology & Applied Sciences, Engineering Index, Metals Abstracts, Science Citation Index, Theoretical Chemical Engineering Abstracts, Automatic Subject Citation Alert and SCISEARCH)

Applied Catalysis Letters

Hydrogenolysis of light hydrocarbons on rhodium/titania. Strong metal–support interactions and analysis of kinetic data
M.J. Holgado and V. Rives (Salamanca, Spain) L1

Surface acidity, catalytic activity and selectivity of some oxides supported on alumina
J.C. Yori, J.C. Luy and J.M. Parera (Sante Fe, Argentina) 1

Acidic properties of ZSM-5 zeolite and conversion of ethanol to diethyl ether
J. Deng, G. Zhang, S. Dong, H. Pan and H. Wang (Shanghai, China) 13

Ethylene oxide oxidation over a supported silver catalyst. I. Kinetics of uninhibited oxidation
L. Petrov, A. Eliyas, C. Maximov and D. Shopov (Sofia, Bulgaria) 23

Ethylene oxide oxidation over a supported silver catalyst. II. Kinetics of inhibited oxidation
A. Eliyas, L. Petrov and D. Shopov (Sofia, Bulgaria) 39

Activity and stability of a copper(II) oxide–zinc(II) oxide catalysts for oxidative dehydrogenation of cyclohexanol to cyclohexanone
Y.-M. Lin, I. Wang and C.-T. Yeh (Hsinchu, Republic of China) 53

Hydrocarbon synthesis over palladium/ZSM-5 bifunctional catalysts
R.T. Thomson and E.E. Wolf (Notre Dame, IN, U.S.A.) 65

Side reactions in quinoline hydrodenitrogenation
D.J. Collins, E.C. Lloyd and R. Miranda (Louisville, KY, U.S.A.) 81

Factors affecting the selectivity of the aromatization of light alkanes on modified ZSM-5 catalysts
M.S. Scurrell (Pretoria, South Africa) 89

Selective hydrogenation of neat isoquinoline. I. Activities of some catalysts and effects of coexisting sulphur-containing compounds in the substrate
H. Okazaki and M. Soeda (Kitakyushu, Japan), K. Onishi and R. Tamura (Osaka, Japan) 99

Effect of thermal treatment on the sintering and structural changes of cobalt–molybdenum/alumina and nickel–molybdenum/alumina hydrotreating catalysts
A. Stanislaus, M. Absi-Halabi, K. Al-Dolama, A. Katrib and M. Ismail (Safat, Kuwait) 109

Deactivation resistance of ZSM-5 type zeolites containing alkaline earth metals used for methanol conversion
H. Okado and H. Shoji (Tokyo, Japan), T. Sano (Ibaraki, Japan), S. Ikai (Tokyo, Japan), H. Hagiwara and H. Takaya (Ibaraki, Japan) 121

(continued overleaf)

Contents (continued)

Preparation of supported $La_{1-x}Sr_xMnO_3$ catalysts by the citrate process
H.M. Zhang, Y. Teraoka and N. Yamazoe (Fukuoka, Japan) 137

Preparation of monovalent copper by a single electron transfer step in the photoreduction of zinc oxide-supported copper catalysts
M. Amara (Paris, France), L. Gengembre (Lille, France) and D. Olivier (Paris, France) 147

Characterization of γ-alumina-supported tungsten sulfide hydroprocessing catalysts. I. Low-temperature oxygen chemisorption
N.K. Nag (Los Angeles, CA, U.S.A.), K. Sai Prasada Rao, K.V.R. Chary, R. Rama Rao and V.S. Subrahmanyam (Hyderabad, India) 165

Large pore nickel/silica–alumina catalysts for hydrogenation of synthetic distillates. Effects of composition and structure
M.F. Wilson, P.R. Mainwaring, J.R. Brown and J.F. Kriz (Ontario, Canada) 177

Hexane–carbon dioxide reaction catalyzed by alkaline earth metal oxides. II. Reaction network
M. Matsukata, S. Sekine, K. Kobayashi, E. Kikuchi and Y. Morita (Tokyo, Japan) 199

Ammonia–hydrazine conversion processes. XVI. Conversion of benzophenone azine into hydrazine catalyzed by sulphonic acids in a two-phase system
H. Hayashi, J. Somei and T. Okazaki (Tokushima, Japan) 213

Effect of water vapor on the activity and selectivity characteristics of a vanadium phosphate catalyst towards butane oxidation
E.W. Arnold, III, and S. Sundaresen (Princeton, NJ, U.S.A.) 225

Comparative study of the activity of titania- and silica-based catalysts for carbon dioxide methanation
R. Spinicci and A. Tofanari (Florence, Italy) 241

Methanol and dimethyl ether conversion to hydrocarbons using tungsten trioxide/alumina as catalyst. A study of catalyst reactivation
G.J. Hutchings, R. Hunter and L. Jansen van Rensburg (Johannesburg, South Africa) 253

Adsorption mechanism of phosphorus on alumina
A. Morales, M.M. Ramírez de Agudelo and F. Hernández (Caracas, Venezuela) 261

Flue gas desulphurisation: Catalytic removal of sulphur dioxide by carbon monoxide on sulphided $La_{1-x}Sr_xCoO_3$. I. Adsorption of sulphur dioxide, carbon monoxide and their mixtures
D. Brynn Hibbert and R.H. Campbell (Egham, Surrey, U.K.) 273

Flue gas desulphurisation: Catalytic removal of sulphur dioxide by carbon monoxide on sulphided $La_{1-x}Sr_xCoO_3$. II. Reaction of sulphur dioxide and carbon monoxide in a flow system
D. Brynn Hibbert and R.H. Campbell (Egham, Surrey, U.K.) 289

Lumped kinetic model for propene–butene mixtures oligomerization on a supported phosphoric acid catalyst
G. Cao, A. Viola, R. Baratti, M. Morbidelli, L. Sanseverino and M. Cruccu (Cagliari, Italy) 301

Characterization of the standard platinum/silica catalyst EUROPT-1. VI. Catalytic properties
G.C. Bond (Uxbridge, U.K.), F. Garin and G. Maire (Strasbourg, France) 313
